

### Hexagon

It is waterproof

Tent cladding is made of 100% polyester fabric with one-sided PVC coating and UV stabilization.
Weight of cladding is 300g/m².

It is all-aluminium

Ideal mechanically resistant tent has all-aluminium construction without plastic joints. Our structures also have Elox finishing, which prevents rusting and spotting.

It is well anchored

Our tents have metal feet with holes for fixing with anchor pins. In addition, we also offer extra accessories for attachment of the tent.

All our tents meet strict European standards for party tents.

Standards do not exist for small tents, yet we guarantee their safety. Technical design and robust construction of Hexagon tents ensure that our tents serve for many years.

They have a strong structure, they are stable and safe.

### All-aluminium tents advantages

All-aluminium tents are stable and also light. Supplied with a protective transport container on wheels for easy handling. Complicated assembly is not required when folding the tent, so it is easy to build even by two people.

#### You will build the tent in less than one minute

Hexagon tents can be very easily and quickly build by two people:

- 1. Remove the tent from the bag
- 2. Legs apart
- 3. Place the tent into the basic position
- 4. Raise the tent at the desired height

### Big Hexagon Extreme

Big Hexagon Extreme is all-aluminium construction of the highest order with hexagonal cross-section legs. The massive iron foot of the tent with large holes for anchoring studs provides the best option for anchoring, which is on the market.

Extreme possibility of anchoring together with the absence of plastic structural connecting pieces ensures that our tent BHE serves in such weather conditions where competing tents are already collapsing.

Therefore, invest in quality!

Colour options:

Profile of legs  $50 \times 1.8 \text{ mm}$ 

Ceiling profile  $35 \times 18 \times 1,8 \text{ mm}$ 

The size of the tent	3 × 3 m	3 × 6 m	3 × 4,5 m	4 × 4 m
Wire model				
Weight of the tent	39 kg	70 kg	53 kg	51 kg
The size of the folded tent	160 × 34 × 36 cm	160 × 59 × 36 cm	160 × 45 × 36 cm	210 × 34 × 36 cm
The size of the tent	4 × 6 m	4 × 8 m	3 × 3 × 3 m	5 × 5 m
Wire model				
Weight of the tent	66 kg	81 kg	72 kg	98 kg

### **Small Hexagon**

Profile legs

 $50 \times 1.8 \, \text{mm}$ 

Structures of Small Hexagon represent an economical variation of structures of the highest order BHE. Even these structures have a hexagonal shape of the leg, but unlike BHE, they have rubber joints. However, these are more flexible compared to plastic joints, which increases their lifespan. Structures of Small Hexagon are also lighter and are excellent in situations when handling and installing is executed especially by women. Cladding is exactly the same as the tents of BHE.

#### The difference from BHE:

- the diameter of the leg is 10 mm less
- ceiling profiles and the strength of the aluminium wall of the structure is also slightly smaller
- it has a rubber joint against aluminium

Colour options:

The size of the tent	2 × 2 m	2 × 3 m	2 × 4 m
Wire model			
Weight of the tent	24 kg	36 kg	40 kg
The size of the folded tent	160 × 28 × 28 mm	160 × 37 × 28 mm	164 × 47 × 28 mm
Rozměr stanu	3 × 3 m	3 × 6 m	3 × 4,5 m
Wire model			
Weight of the tent	26 kg	46 kg	38 kg
The size of the folded tent	160 × 28 × 28 mm	160 × 47 × 28 mm	160 × 37 × 28 mm

## Accessories

Protective transport container on wheels

Sand loads

Iron load 15 kg

Anchoring Kit for soft surface

Mosquito nets

Window

Door

Eaves

Small table

Half wall on a table

The entire wall

Floorboards

### **Printing**

We offer two types of printing. **Digital sublimation**, which is the most advanced printing technology. The results are eye-catching and the printing has a durability of 5 - 7 years. Another method is **screen printing**, which is more suitable for smaller monochromatic themes.

Quality graphic design always has a positive impact on the overall appearance of the tent. We offer you a complete graphic design from layout to printing. In case you want to use your own graphic designer, we will send you patterns for more precise creating of a design.

#### Samples of implemented tents:

# Tents in action

#### Jana Tichá, Czech catering, satisfied customer – sale

"Professional folding all-aluminium tents of Big Hexagon Extreme series are purchased from partystan.cz Ltd. after years of our usage of conventional technologies, which are available in the local hobby shops. These, however, served only till the first stronger gust of wind or our first error during installation / uninstallation. Professional BHE tents series is so powerful that I need not fear whether my tent will stand at the event in windy weather. Installation and uninstallation can be performed even by inexperienced temporary workers.

Metal joints and the strength of aluminium profiles keep my investment alive because there is nothing to break, nothing to bend. I have not had to solve any complaints for two seasons of their usage. When I calculate how much money and time I spent on permanent repairs and complaints about previously used low quality tents, I can only confirm the old Czech saying: "cheap poor thing - is twice as expensive."

"I very much appreciate the quality of party tents and other technologies provided by partystan.cz Ltd. For our corporate events, we always get a party tent, which is almost indistinguishable from a new one. We have found a reliable partner in partystan.cz Ltd. This company assures us that we will not have to be ashamed in front of our customers of the level of technical support of our actions."

Tomáš Čejpa, Esab Vamberk, satisfied customer – lease
